# KINDERGARTEN MANDARIN CLASS

Ms. Iting Chen- Teacher

**No person too small to make a difference.**

Protecting and preserving natural habitats has never been so important in the history of humanity. Unfortunately, habitat loss is among the greatest threats to species diversity and the natural flora of the world. Human activity has caused great loss to natural land cover, oceans, and animals. It is important that our students realize that this is a global responsibility. With this song, sung in Mandarin, the students learned that no person is too small to make a difference in preserving habitats so that all creatures can have a home.
